

Description

The mesh is designed for bushfire prone areas subject to ember attack and to repel pine trees, jacarandas and other fine debris. Ideal for possums, birds, vermin, water tanks and areas where fine tree debris falls.

The 1.9mm aperture is the designed to keep out even small debris but still work during heavy downpours to ensure maximum water collection.

Specification Info

	Ember Mesh
Key Features	<ul style="list-style-type: none">• Designed to repel fine debris <i>e.g.</i> pine needles• Directional holes for water penetration• Akzo Nobet 01010 powder coating• Bushfire compliant AS3959/2018
Base Material	Aluminium
Aperture	1.9mm
Application Type	Gutter Guard or Ember Guard
Coating/Colouring	Powder Coating 01010
Manufacturing	Machine woven with rolled edge
Mesh thickness	1.1 mm
Mesh weight	500 gsm
Warranty	15 Years
Max Size	30 m
Standard Widths in mm	250, 500, 1000
Bushfire Tested	Compliant AS 3959-2018
Gutter Guard Bushfire Attack Level (BAL) Rating	BAL-12.5, BAL-19, BAL-29
Ember Guard Bushfire Attack Level (BAL) Rating	BAL-12.5, BAL-19, BAL-29
